

## PROBLEMS WITH GOOGLE CHROME

Google Chrome uses its own “built-in” PDF viewer that does not support all of the Adobe form’s features in the Educational Training Fee Remittance Report form. Therefore, when this fillable form is opened on the internet using the Google Chrome browser, the fillable forms will not work correctly. For example, Chrome did not subtract line 6 from line 5, resulting in an overpayment of funds to the State.

Solution:

1. Municipalities should save the blank form to their computer, close the form on the internet, and then open the form from their computer using Adobe Reader or Acrobat. Once the form is opened in Adobe, the fillable fields should work correctly. Municipalities are advised to check their calculations manually.

OR

2. Municipalities experiencing problems are advised to use **Internet Explorer** (not Google Chrome) to open the Educational Training Fee Remittance Report and to check their calculations manually.

OR

3. Use the Word document and check calculations manually.
